

Land Drain drainage systems are used in agricultural, sports and leisure sectors where land management requires effective water table control. Land Drain is ideal to use where excess water is threatening restricted land access, reduced crop yield, soil erosion and environmental damage. Polypipe offer a choice of materials, diameters, colours and coil lengths, complemented by a unique range of systems specifically designed to aid in the effective management of land water drainage.

## KEY FEATURES AND BENEFITS

- Full range of pipes and fittings in sizes from 60-200mm
- Blue systems Kitemarked to BS 4962
- Perforated and unperforated options
- Available with geotextile wrap
- Flexible, durable, easy to install
- Extremely cost effective
- Supported by a full range of fittings including end caps and multi-junctions
- Manufactured in blue PVCu as standard, also available in black and yellow
- Each coil is supplied with 1 connector

PVCu Land Coil & Connectors								
Product Code	OD mm	ID mm	Length m	Description	Perforation length mm	Perforation width mm	Design no. of perforations per m	Connector Code
